

Learn the right skills & approach for the Power Platform

**Introducing the Hitachi Solutions Power Platform
Centre of Excellence**

Nurture & Grow Training & Hackathon:

The strength that the Power Platform provides is the ability for all people within an organisation to quickly build low to no code business applications, automate business processes within and between multiple applications, data bases and more, it allows you to build artificial intelligence into your solutions and receive rich analytics and intelligent insights through advance reporting tools. This can be accessed by anyone with an Office 365, Dynamics or other license. Further to this there are An integral part of the Hitachi Solutions Centre of Excellence is the 'Nurture & Grow' pillar. Once the client has the right compliance mechanisms and monitoring tools in place to ensure that their users can leverage and utilise the Power Platform toolset in an environment that reduces risk, the next stage is to ensure they have been trained on how to appropriately build enterprise ready solutions.

Hitachi Solutions have a "Training & Hackathon" pre-packaged two-day delivery offering. This is two days that the client's citizen developers, developers, professional developers and other members of your organisations will understand different parts of creating a 'Project & Programme Management' solution from the Power Platform toolset. The first day focuses on an organic approach to building solutions that follow best practice – this is not just about the outcome of the solution being built but knowing that the client participants are understanding why apps are built in a certain way and how to ensure that they are enterprise ready.

The topics covered include the following:

- ✔ **Solution management** (creating Power Platform "packages" that you can take from one environment to another).
- ✔ **Data Flows.**
- ✔ **Common Data Service.**
- ✔ **Power Apps:**
- ✔ **Model-Driven Applications.**
- ✔ **Canvas Applications.**
- ✔ **Power Automate.**

On the second day, there will be a structured hackathon – where our specialists can ensure that participants have understood their training and can apply it. Participants will be separated into teams and work towards building real business solutions that we have identified with you prior.

Our specialist Power Platform team made up of Microsoft MVPs and highly experienced Power Platform consultants will be onsite to assist and provide support throughout both days.

After the initial 'Training & Hackathon' it is important that internal collaboration, support and engagement is encouraged to assist with continued growth of the skill set within your business. Hitachi Solutions recommends collaborative tools such as Microsoft Teams and Yammer is utilised to ensure an internal community support framework is adopted mixed with the ability to showcase certain Power Apps and Power Automates via the "Solutions Hub" offering.

Example Two-day Agenda

Day one:

Creation of a solution through beginner to intermediate understanding, best practice driven, hands on learning.

Day two:

Hackathon – working towards your real business challenges to ensure that participants can apply the training correctly.

The following will be delivered:

Prior to the event:

- Packaged invitation and guided, responsive interactive emails.
- Animated 5-minute-long videos introducing the participants to the Power Platform.
- Organisations of the hackathon.

1

First Day

- Reference and training lab books that not only walks the participant through the training but also teaches them about jargon, application development, data modelling and so much more! This is guided by an experience and senior instructor.
- Understanding of the Power Platform tool set (CDS, Data Flows, Power Apps, Power Automate).
- Hands on assistance by Power platform focused experts to ensure a smooth progression through the training.

2

Second Day

- Fully packaged hackathon – agenda, supporting applications, judging criteria and much more.
- The ability to revisit any individuals that may need assistance to apply certain aspects of the training from the day before and identification of strong citizen developers.
