

Hitachi Solutions

WORKSHOP

Fabric in a Day

Workshop to help you progress through the complete data journey – connecting, transforming, modelling, and visualising data using Microsoft Fabric.

25th February 2026

HITACHI

Speakers

Graeme Gord

Senior Architect
Hitachi Solutions

Graeme is a Senior Architect with over 20 years of consulting experience, focuses on the delivery of data and analytics solutions. He has been involved in implementing and establishing many successful programmes and projects covering data warehousing, data platforms, data visualisation, and self-service analytics solutions. These initiatives have enabled clients – and their users – to engage with their data and gain actionable insights by means of best-in-class Microsoft platforms and impactful visualisations.

Anthony Sheldrake

Architect
Hitachi Solutions

Anthony is an experienced Data Architect with a decade of expertise in analytics and data platform design. He delivers innovative Microsoft-based solutions that transform how organisations manage, model, and visualise their data. Anthony specialises in building scalable architectures in Azure and Microsoft Fabric that help businesses unlock insights, improve efficiency, and make data-driven decisions with confidence.

Rumen Krastev

Global Senior Partner Solution Architect
Microsoft

Rumen is Global Senior Partner Solution Architect with over 25 years of experience in IT and specialising in the Data & AI space. Rumen is part of the special Fabric Insider Program of Microsoft Fabric Product Group, which gives him direct access to the Fabric Engineering and latest news and roadmaps as well the opportunity to advocate for feature request from customers and partners. He's also Architect Champion for Microsoft Cosmos DB and PostgreSQL for EMEA and certified Microsoft Azure Solutions Architect Expert and Microsoft Certified Trainer.

Speakers

Matt Holmes

Business Development Director, Commercial
Hitachi Solutions

Matt is a Business Development Director at Hitachi Solutions Europe with over 25 years' experience in software and deep expertise in the Microsoft ecosystem. He helps organisations drive long-term digital transformation through a consultative approach.

Sarah Coward

Product Manager
Defra

Sarah has worked in the Civil Service for nearly four years in Product Management roles and has over 20 years of experience in IT, beginning her career working with Sybase databases on Unix platforms for a financial company. Over the years, she has held a variety of IT roles, transitioning from hands-on technical data positions into more product-focused roles. focuses on understanding user needs to ensure the delivery of effective and enabling products.

Ayesha Jacob

Cloud and AI Platform Data and Analytics GTM Manager
Microsoft

Ayesha focuses on fostering strategic partnerships that drive mutual growth in the B2B sector. Her work involves developing comprehensive strategies and go-to-market plans in collaboration with customers and partners, helping transform both customer engagement and internal operations. With a background in technology and business management and experience supporting small and medium-sized enterprises, Ayesha is passionate about guiding businesses toward growth and innovation.
